

December 2002

**Sacramento
and
San Joaquin
River Basins**

Comprehensive Study

TECHNICAL STUDIES DOCUMENTATION

APPENDIX E

RISK ANALYSIS

**US Army Corps
of Engineers**
Sacramento District

TABLE OF CONTENTS

INTRODUCTION.....	1
TRADITIONAL RISK ANALYSIS APPROACH	1
COMPREHENSIVE STUDY METHODOLOGY	2
Impact Areas and Index Points	4
MODELING TOOLS	8
Hydraulic Models.....	8
UNET	9
FLO-2D	9
Flood Damage Analysis Tools.....	9
HEC-FDA.....	9
@RISK.....	10
Upper Sacramento Spreadsheet Analysis.....	10
GIS	10
Ecosystem Function Model.....	11
TECHNICAL CONSIDERATIONS AND ASSUMPTIONS	11
Hydrologic Studies.....	11
Geotechnical Evaluation	11
Technical Approach	12
Levee Evaluation.....	13
Assumptions.....	13
Levee Reliability Evaluation.....	14
Key Findings and Considerations	21
Hydraulic Studies.....	21
River System Modeling.....	22
Key Findings and Considerations	23
PROJECT PERFORMANCE	24
Annual Exceedence Probability (AEP).....	24
Long Term Risk (LTR)	24
Conditional Non-Exceedence Probability by Events (CNE)	24
Existing Condition	25
Future Without-Project and With-Project Condition.....	28
EXPECTED ANNUAL DAMAGES	29
HEC-FDA Input Parameters	29
Existing Condition	30
Future Without-Project Condition	30
Alternative or With-Project Economic Evaluations	30
ENVIRONMENTAL RESTORATION	31
SUMMARY & CONCLUSIONS.....	31

REFERENCES..... 32

TABLES

Table 1	Sacramento River Basin Impact Areas	5
Table 2	San Joaquin River Basin River Basin Impact Areas.....	6
Table 3	Assignment by Reach of Sacramento River Basin Geotechnical Probability of Failure Curves.....	18
Table 4	Assignment by Reach of San Joaquin River Basin Geotechnical Probability of Failure Curves.....	20
Table 5	Existing Condition Project Performance Statistics for the Sacramento River Basin	25
Table 6	Existing Conditions Project Performance Statistics for the San Joaquin River Basin	27
