

December 2002

**Sacramento
and
San Joaquin
River Basins**

Comprehensive Study

TECHNICAL STUDIES DOCUMENTATION

APPENDIX G

ECOSYSTEM FUNCTIONS MODEL

**US Army Corps
of Engineers**
Sacramento District

CONTENTS

TECHNICAL APPROACH AND MODEL DEVELOPMENT.....	1
TERRESTRIAL AND AQUATIC RELATIONSHIPS	3
Terrestrial Ecosystem Element	3
IA - Potential Riparian and Wetland Zones.....	4
IB - Rates of Ecosystem Change	5
IC - Connectivity to Aquatic Habitats	5
ID - Land-Use Constraints	5
IE - Wildlife Habitat Suitability.....	5
Aquatic Ecosystem Element	6
Stream Channel.....	6
Floodplains And Flood Bypasses.....	7
STATISTICAL HYDROLOGIC ANALYSIS	8
Category 1 – Flow Frequency.....	8
Category 2 – Monthly Average Flows.....	10
Category 3 – Stage-Duration-Frequency	10
Category 4 – Stage Decline Rate	11
Category 5 – Highest Sustained Stage	12
EFM Statistical Analysis FORTRAN Software Package.....	12
HYDRAULIC ANALYSIS.....	13
EFM PILOT STUDIES	13
San Joaquin River near Vernalis.....	13
Ecological Analysis	14
Hydrologic Analysis	14
Hydraulic Analysis.....	20
GIS Analysis.....	21
Ecological Interpretation.....	24
Preliminary Results and Field Verification.....	24
Sacramento River near Princeton.....	25
Preliminary Results.....	26
REFERENCES	

TABLES

Table 1	Components of the Terrestrial Ecosystem Element.....	4
Table 2	Components of the Aquatic Ecosystem Element.....	6
Table 3	Input Requirements for Terrestrial and Aquatic Relationships	9
Table 4	Statistical Flow Analysis for Vernalis Pilot Study	20
Table 5	Statistical Flow Analysis for Princeton Pilot Study.....	26

FIGURES

Figure 1	EFM Process	2
Figure 2	Sample Empirical Flood Frequency Curve.....	10
Figure 3	Sample Output Data for Ecosystem Requirement IIB-1.....	11
Figure 4	Sample Output Data for Ecosystem Requirement IA-3.....	12
Figure 5	San Joaquin EFM Pilot Study Area	14
Figure 6	Mass Diagram Analysis of January Daily Flows.....	15
Figure 7	Mass Diagram Analysis of February Daily Flows.....	15
Figure 8	Mass Diagram Analysis of March Daily Flows.....	16
Figure 9	Mass Diagram Analysis of April Daily Flows.....	16
Figure 10	Mass Diagram Analysis of May Daily Flows.....	16
Figure 11	Mass Diagram Analysis of June Daily Flows.....	17
Figure 12	Mass Diagram Analysis of July Daily Flows	17
Figure 13	Mass Diagram Analysis of August Daily Flows.....	17
Figure 14	Mass Diagram Analysis of September Daily Flows	18
Figure 15	Mass Diagram Analysis of October Daily Flows	18
Figure 16	Mass Diagram Analysis of November Daily Flows	18
Figure 17	Mass Diagram Analysis of December Daily Flows.....	19
Figure 18	Empirical Flood Frequency Curve for San Joaquin River near Vernalis	19
Figure 19	1998 Aerial Photograph of San Joaquin Pilot Study Area.....	21
Figure 20	Average August Water Surface Elevation (1458 cfs).....	22
Figure 21	Water Surface Elevation of 3-Year Flow (23,600 cfs)	22
Figure 22	Flow Meeting EFM IIB-1 Criteria (14,800 cfs).....	23
Figure 23	20% Probability Floodplain with Hypothetical Levee Realignment (33,340 cfs).23	
Figure 24	Potential Cottonwood Recruitment Zones	24
Figure 25	Princeton Study Area	25
Figure 26	Potential Willow – Cottonwood Recruitment Zone.....	27
Figure 27	Potential Floodplain Rearing Habitat.....	28

ATTACHMENTS

Attachment G1 – EFM Statistical Analysis Program FORTRAN Software Package

Attachment G2 – Input Command File to the EFM FORTRAN Software Package

Attachment G3 - Sample Input Data File to the EFM Statistical Analysis FORTRAN Software Package

Attachment G4 – Sample Output Files from the EFM Statistical Analysis FORTRAN Software Package
