

Links in order for brief CALFED central canal 2012 update: 3/12/2011 video

N. Suard, Esq. Snug Harbor Resorts, LLC off Ryer Island, Steamboat Slough in the northern area of the California Delta region.

Review by Nicole Suard, Esq, who is not associated with any of the governmental or water agencies involved in the BDCP or Delta Conveyance alternatives. After more than two years of research and study of past reports, documents and maps, I am providing the links and video review for other Delta land owners, businesses and residents to help them understand the current actual status of the CONVEYANCE portion of the last 12 years of CALFED actions. **Summary: The “central conveyance canal” of the BDCP, which is called the “Through Delta Facility (TDF) in CALFED documents, may be completed by 2012 because many of the sections of the canal have already been constructed along with other “regional projects”. If one considers the flow capacity of the Freeport pumps along with the increased Delta Cross Channel flow capacity (as part of the Through Delta Facility per CALFED) so much water from the Sacramento River will be diverted that there won’t even be a need for another canal!**
